TOILET DOES NOT NEED TO BE REMOVED FROM VEHICLE FOR BASIC REPAIRS *(if necessary)*

Flush ball seal – Dometic's revolutionary ball seal allows future replacement of worn or damaged ball seals without requiring tools or toilet disassembly. The ball seal can be changed in just a few minutes without removing the toilet from the floor. Detailed replacement instructions are included with replacement ball seal kits.

Snap-in water valve cartridge – Allows easy replacement of worn or damaged water valves. In cold climates, be sure to follow winterizing procedure in owner's manual to help avoid water valve failure. Refer to replacement instructions in new water valve kit prior to removal or installation of water valve assembly.

Factory-sealed bowl-to-base assembly – Unlike other Dometic foot-pedal toilets, **the bowl and base of 300, 310, and 320 series toilets should not be separated for any reason.**

Each Dometic toilet is 100% factory-tested to assure a watertight seal in the toilet bowl before it is shipped.

After installation at the RV or other vehicle factory, the entire toilet and waste tank system is flood-tested for leaks by filling the system with water to the rim of the toilet bowl. This process requires holding the flush ball open with a device which may temporarily distort the ball seal from its original shape and, as a result, cause the seal to leak water into the waste tank during normal use. The ball seal may need to be reconditioned to its original shape.

IF NEW TOILET DOES NOT HOLD WATER IN BOWL...

Please follow the procedures below before attempting to replace the seal.

1. Hold flush ball in full open position by pressing on pedal.
2. Using finger, apply moderate downward pressure around edge of ball seal.
3. Close flush ball.
4. Keeping flush ball closed, pour one quart of hot tap water into toilet bowl.
5. Let water cool completely.
6. Check for leak.

If leak still persists, flush ball seal should be replaced. Follow instructions provided with replacement seal kit.

Notes on using the manual

Caution!

Safety Instruction: Failure to observe this instruction can cause material damage and impair the function of the device.

Note

Supplementary information for operating the device.

fig. **1** A : This refers to an element in an illustration. In this example, item A in figure 1.

General safety instructions

The manufacturer will not be held liable for claims for damage resulting from the following:

- Faulty installation or connection
- Damage to the unit from mechanical influences, misuse or abuse
- Alterations to the unit without express written permission from the manufacturer
- Use for purposes other than those described in this manual

Warnings

The following statements must be read and understood before installing, servicing and/or operating this product. Modification of this product may result in property damage.

1. Do not use chlorine or caustic chemicals, such as laundry bleach or drain-opening types, in the system. These products damage the seals in toilets and other plumbing valves.
2. Do not permit foreign objects (paper towels, paper cups, diapers, sanitary napkins, etc.) to be flushed through the toilet.
3. Mechanical seal toilets are designed to only discharge directly into a holding tank. Horizontal pipe runs as found in conventional residential or commercial plumbing systems cannot be accommodated.
4. Toilet bowl must be regularly cleaned and winterized according to "Cleaning" and "Winterization and storage" procedures in this manual, or your warranty coverage may be voided.

Intended use

Dometic 300, 310 and 320 series toilets provide lightweight, residential-size toilets for installation directly above a holding tank.

Benefits

PowerFlush technology. Improved pressurized rim flow creates high-speed vortex of water for full bowl rinsing.

Premium user comfort. Full-size seat and deep bowl result in greater homelike performance.

Easy installation. Two-bolt design fits most existing toilet floor flanges – great for new or replacement installations. Just place on floor flange, tighten bolts, connect water, and it's ready.

Ergonomically enhanced pedal operation. Lower pedal height for easier use; "one-direction" action to add water and flush.

Customer service

Toilet model identification

The toilet model identification label is located on the toilet base under the water valve. Please have this information ready if contacting Dometic for customer service.

Contact information

There is a strong, worldwide network to assist in servicing and maintaining your toilet system. For the Authorized Service Center near you, please call from 8:00 a.m. to 5:00 p.m. (ET) Monday through Friday.

You may also contact or have your local dealer contact the Parts Distributor nearest you for quick response to your replacement parts needs. They carry a complete inventory for the Dometic product line.

low-profile height

7 Operation

7.1 Add water to bowl

To add water to the toilet, press the flush pedal part way down. Water flows into the bowl while flush ball remains closed. If the flush ball moves, let up on the pedal slightly. Adding water to an empty bowl helps prevent holding tank odors from entering the living space. Adding water is recommended prior to flushing solids and toilet paper.

7.2 Flush toilet

To flush, press pedal down until it contacts the floor. Release pedal after complete flush.

- When flushing liquids, press the pedal for 1-2 seconds.
- When flushing solids, press pedal until contents are rinsed from bowl. Flushing longer than necessary will cause holding tank to fill too quickly.

A small amount of water will collect in the bowl after a flush to create an airtight seal.

Note

Residual water trickle in ceramic bowls: Due to integrated rim of models 310, 311, 320 and 321 toilets, water may continue to trickle into toilet bowl for up to 20 minutes after flushing. If water trickle continues after 30 minutes, replace water valve.

Note

To ensure holding tank odors do not enter the living space, make sure 1 inch (24 mm) of water remains in the toilet bowl. Depending on variations in plumbing systems and user operation, the "add water" function may be required to achieve the 1-inch water depth.

8 Cleaning

8.1 Routine toilet cleaning

For routine cleaning, use SeaLand® Toilet Bowl Cleaner. If this cleaner cannot be found in your area, contact Dometic for your nearest dealer. If the cleaner is not available, use most any non-abrasive bathroom and toilet bowl cleaner. Please follow label instructions.

For stubborn stains on model 300 and 301 toilet bowls, carefully use rubbing alcohol to remove them.

8.2 Flush ball/seal cleaning

After a period of time, mineral deposits from hard water may build up on the flush ball or seal, resulting in a slow water leak. To prevent this, periodically clean the flush ball and seal.

1. Remove minor debris from the flush ball and seal by slowly pressing and releasing the flush pedal several times. This will loosen and rinse debris from the surfaces. Repeat several times for stubborn buildup.
2. If step 1 does not fully clean the ball and seal, clean with a soft bristle brush and SeaLand toilet bowl cleaner. Fully clean the top of the flush ball and under the seal where it contacts the flush ball. After cleaning underside of seal, apply light downward pressure to top of seal while brushing around full perimeter of seal.
3. If this does not correct a leaking seal, it may require replacement.

Specifications

Materials

Toilet bowl: vitreous ceramic (models 310, 311, 320, 321); polypropylene (models 300, 301)

Toilet seat: polypropylene (models 300, 301, 310, 311); enameled wood (models 320, 321)

Flush ball seal: nitrile butyl rubber

Toilet base: polypropylene

Foot pedal: polypropylene

Water valve: polypropylene

Vacuum breaker: ABS/polypropylene

Floor seal: nitrile rubber, foam

311), enameled wood (models 320, 321)

Floor seal: nitrile rubber, foam

Flush ball seal: nitrile butyl rubber

Toilet base: polypropylene

Minimum installation requirements

Water Supply	Fitting	0.5 in. NPT
	Flow rate	3.0-5.0* gpm / 11.4-18.9 lpm recommended 2.0 gpm / 9.5 lpm minimum
	Static pressure	30-100 PSI / 206.8-689.5 kPa
Discharge	Floor flange	3 in./76 mm ID, 1/4 - 7/16 in. thick

* Water supply that exceeds 5.0 gpm/18.9 lpm may require a flow restrictor at toilet inlet.
Specifications subject to change without notice.

Installation

Note

Be sure foot pedal, when pressed, touches same flat surface on which toilet is installed.

Note

Be sure to follow recommended installation requirements in this manual.

Tools required

- pliers or adjustable wrench
- 7/16-in. / 11 mm wrench

Toilet installation

1. To replace an older toilet, turn off water supply to toilet. Remove and drain water supply line. Remove toilet hold-down bolts/screws. Remove toilet from floor. Remove and discard old floor flange seal and hold-down bolts. Verify center of floor flange is at least the recommended rough-in distance from back wall (fig. 3 A) for your toilet model (see **Rough-in dimensions** chart). Make sure top surface of floor flange is clean and free of any debris or sealant.
2. If installing a new floor flange, make certain that toilet mounting holes are located at the correct angle (fig. 3 D). Floor flange must be secured to floor with a minimum of four screws (8 is preferred). Insert two supplied T-bolts into slots in floor flange (fig. 4).
3. Verify that floor flange seal is installed on base of toilet (fig. 5 A). Carefully set toilet over floor flange. Align holes in toilet base with T-bolts as toilet is lowered onto floor flange. Toilet must be aligned so that outlet of base fits inside of floor flange outlet hole.

Note

Entire toilet base does not rest completely on floor yet. Floor seal must be compressed in following steps.

4. Install floor mounting nuts and washers onto T-bolts. Carefully torque nuts to 30-40 inch-pounds. DO NOT OVERTIGHTEN. Alternate between sides when tightening to prevent distortion of base. When tight, base should be securely attached and flat against floor. Attach bolt covers onto nuts. (Fig. 5 B)
5. If toilet is being installed in a shower stall, apply a bead of caulk around base of toilet to prevent water seepage under base.
6. Connect water supply line and torque connection to 30-40 inch-pounds (fig. 5 C). DO NOT OVERTIGHTEN. NOTE: Model 301 toilet may require 1/2-in. elbow fitting or adapter.
7. Turn on water supply line. Flush toilet several times and check for leaks.

Winterization and storage

When a Dometic toilet is stored for long periods of time or may be exposed to temperatures below freezing, the toilet must be winterized or stored according to one of the following procedures.

Caution

This toilet is not intended for use when exposed to temperatures below freezing.

Caution

Never use automotive-type antifreeze (ethylene glycol) in freshwater systems.

Note

Use nontoxic antifreeze (propylene glycol) designated for potable water systems. (See vehicle owner's manual.)

Storage options

Non-toxic Antifreeze Winterization (recommended method)

1. Pour antifreeze in potable water tank according to instructions from antifreeze manufacturer.
2. Flush toilet several times until antifreeze has flowed completely through toilet. For toilets with hand sprayer, the hand sprayer must be turned on to assure antifreeze is cycled through the sprayer.

Drain Water from Toilet

1. Turn off water supply to toilet.
2. Remove water supply line from water valve.
3. Place a small container under water valve inlet to catch draining water.
4. Press flush pedal and allow water to completely drain from water valve and vacuum breaker.
5. Leave water line disconnected until threat of freezing temperature is past.

Note

Never leave vehicle or premises unoccupied for extended periods of time with municipal water supply or onboard water pump turned on when there is a possibility of freezing temperature.

IMPORTANT:

Toilet warranty does not cover freeze-damaged water valve

The Dometic 300, 310 and 320 series toilet warranty expressly excludes coverage for any damages to the toilet or vehicle that may occur as a result of improper winterization of the toilet. **An indicator of improper winterization is freeze damage to the water valve which results in leaks.**

Dometic toilet water valves exceed maximum water pressure as defined by North American plumbing code agencies. However, if trapped water freezes in piping that supplies water to the toilet, it expands and creates extremely high pressure that can damage the valve (see photo). To avoid this, winterize the toilet as described in this manual. If freeze-damage occurs as a result of improper winterization, replace the water valve with a 300/310/320 series toilet water valve kit, part number 385311641. **IF WATER VALVE IS RETURNED FOR WARRANTY CLAIM, DOMETIC RESERVES THE RIGHT TO DENY CLAIM IF PROBLEM IS CAUSED BY FREEZE DAMAGE.**

Fig. 6 A – Freeze Damage Indicator Window: white stress marks indicate freeze damage
B – Water valve damage due to severe exposure to below-freezing temperature

Troubleshooting

Problem	Possible Cause	Service Instruction
1. Water will not stay in bowl.	a. Ball seal is not properly positioned. b. Flush ball or seal is dirty. c. Worn or damaged flush ball seal.	a. Press pedal to hold flush ball open, then lightly press down around edge of ball seal with finger to conform to flush ball. b. Clean flush ball and seal. c. Replace seal.
2. Odor emits from toilet when flush ball is open.	a. Plugged holding tank vent. b. Odor from holding tank contents.	a. Clear obstruction from vent. b. Add deodorant to holding tank.
3. Odor emits from toilet when flush ball is closed.	a. No water in bowl. b. Damaged flush ball seal. c. Damaged floor flange seal.	a. Add water to bowl. b. Replace seal. c. Replace floor seal.
4. Flush ball will not close completely.	a. Too much friction between flush ball and seal.	a. Clean and lubricate flush ball and seal with silicone spray or furniture polish.
5. Water flow into toilet will not stop.	a. Worn or defective water valve.	a. Replace water valve.
6. Water does not enter toilet bowl properly.	a. Insufficient water flow rate at toilet inlet. b. Screen at water valve inlet is clogged. c. Water valve is worn or damaged. d. Plugged rim wash holes or rim jet (300 series only) in toilet.	a. Make sure flow rate at toilet inlet is 3.0-5.0 gpm / 11.4-18.9 lpm (recommended rate). b. Clean screen. c. Replace water valve. d. Clean rim wash holes.
7. Hand sprayer leaks (hand sprayer is not provided with all models).	a. Hand sprayer is defective.	a. Replace hand sprayer.
8. Water is leaking from water valve.	a. Water line connection is loose or not seated properly. b. Water valve is damaged or defective.	a. Insure that threads are not cross-threaded and tighten connection. b. Replace water valve.
9. Water is leaking from toilet base.	a. Toilet is not secure to floor. b. Worn or defective floor flange seal.	a. Tighten toilet mounting bolts. b. Replace floor flange seal.
10. Water is leaking from rear of toilet.	a. Loose vacuum breaker. b. Damaged or defective vacuum breaker. c. Cracked or defective toilet bowl.	a. Make sure vacuum breaker stem is pushed fully into sealing grommet in back of bowl (310 and 320 series), or securely connected to rim jet (300 series). b. Replace vacuum breaker. c. Replace toilet.

Limited Warranty

**THE SELLER NAMED BELOW MAKES THE FOLLOWING WARRANTY WITH RESPECT TO
DOMETIC GRAVITY-FLUSH MODELS 300, 301, 310, 311, 320, AND 321 ONLY**

1. TWO-YEAR LIMITED WARRANTY

1A. This Limited Warranty will be in effect for two years from the date of purchase.

1B. This Limited Warranty is made only to the First Purchaser (hereinafter called the "Original Purchaser") who acquired the product for Original Purchaser's personal, family, or household-type use. The Original Purchaser should retain a copy of the sales receipt or invoice as evidence of the date of purchase because proof of purchase is required to obtain warranty service.

1C. If this product is placed in commercial or business use, it will be warranted, to the Original Purchaser only, to be free of defects in material and workmanship for a period of 90 days from the date of purchase.

1D. This warranty covers all parts of the Dometic toilet which is warranted to be free of defects in material and workmanship under normal use. This warranty does not cover conditions unrelated to the material and workmanship of the product. Such unrelated conditions include, but are not limited to, (a) faulty installation and any damage resulting from such; (b) the need for normal maintenance and any damage resulting from failure to provide such maintenance; (c) failure to follow Seller's instructions for use of this product, including failure which may result from not following winterization procedures; (d) any accident that results in damage to this product; (e) scratching or staining of any ceramic or plastic component; and (f) acts of God, or misuse of any part of this product and any alteration by anyone other than the Seller.

1E. For Original Purchaser (ONLY) to obtain the benefits of this Warranty during the 2-year period (for personal use) or 90-day period (for commercial use), the following shall apply:

(a) Original Purchaser shall contact the local dealer from whom the product was purchased; or contact the Seller Customer Service Department at 1-800-321-9886 (8 a.m.-5 p.m. ET, USA) and provide the local dealer or Seller Customer Service Department with sales receipt or invoice, product model and serial number from product. The product model identification label is located on the toilet base under the foot pedal and water valve (see illustration).

(b) If product, while still under warranty, is returned to local dealer where purchased, the local dealer will repair, replace or refund the product per this Warranty and as authorized by the Seller. Seller will provide necessary replacement parts or product free of charge to Original Purchaser, including freight on such replacement parts or product, and Seller will pay direct labor charges for such repair or replacement.

(c) Under no circumstances will Seller pay or be liable for any of Original Purchaser's or dealer's travel charges or other expenses associated with bringing the product or recreation vehicle to the dealer for repair, for providing dealer with access to the product or vehicle, or for downtime of the product or vehicle.

(d) Original Purchaser may be required to return defective product or parts when requested by Seller; in such event, Seller will pay related freight costs.

Location of product ID label

2. THE SELLER DOES NOT AUTHORIZE ANY PERSON OR COMPANY TO CREATE OR EXTEND ANY WARRANTY OBLIGATIONS OR LIABILITY ON ITS BEHALF.

3. REPAIR OR REPLACEMENT OF, OR REFUND FOR, DEFECTIVE PRODUCT, AT SELLER'S OPTION, SHALL BE THE ORIGINAL PURCHASER'S SOLE REMEDY UNDER THIS LIMITED WARRANTY. IN NO EVENT SHALL SELLER BE LIABLE FOR PURCHASER'S INCIDENTAL OR CONSEQUENTIAL DAMAGES. SOME STATES DO NOT ALLOW THE EXCLUSION OR LIMITATION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES, SO THE ABOVE LIMITATION OR EXCLUSION MAY NOT APPLY TO YOU.

4. SELLER DISCLAIMS ALL OTHER WARRANTIES WITH RESPECT TO THE PRODUCT, WHETHER EXPRESS OR IMPLIED, AND SPECIFICALLY DISCLAIMS THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. SOME STATES DO NOT ALLOW LIMITATIONS ON IMPLIED WARRANTIES OR HOW LONG AN IMPLIED WARRANTY LASTS, SO THE ABOVE LIMITATION MAY NOT APPLY TO YOU.

5. THIS WARRANTY GIVES YOU SPECIFIC LEGAL RIGHTS, AND YOU MAY ALSO HAVE OTHER RIGHTS WHICH VARY FROM STATE TO STATE.

SELLER:

Dometic Corporation - Sanitation Div.
13128 SR 226
Big Prairie, Ohio 44611 USA
330-439-5550

Dometic Group is a customer-driven, world-leading provider of leisure products for the RV, automotive, truck and marine markets. We supply the industry and aftermarket with a complete range of air conditioners, refrigerators, awnings, cookers, sanitation systems, lighting, mobile power equipment, comfort and safety solutions, windows, doors and other equipment that make life more comfortable away from home.

Dometic Group supplies a wide range of workshop equipment for service and maintenance of built-in air conditioners. Dometic Group also provides specially designed refrigerators for hotel rooms, offices, wine storage and transport and storage of medical products.

Our products are sold in almost 100 countries and are produced mainly in wholly-owned production facilities around the world.
